### The Hungarian Crisis.

Vienna, Sept. 25 .-- Count Cziraky. who was appointed by the King Emperor Francis Joseph to negotiate with the leaders of the Coalition parties in the Hungarian Diet, with a view to the formation of a Hungarian cabinet, had a conference with these China. leaders yesterday lasting for an hour and a half.

It is understood that the count received from them a written declaration to the effect that they would be unable to assume the responsibility of government on the conditions imposed by his majesty, as these conditions were directly in opposition to their personal views and also in opposition to the mandate of the people at the last election.

Count Cziraky then left the conference to report to the king empe ror, promising to return with his majesty's reply. After an audience of the king emperor Count Cziraky naturned to the hotel and found that Count Julius Andressy, Count Zichy, Baron Banffy and Francis Kossuth had departed for Budapest and that Count Albert Apponyi, the other representative of the coalition had gone to join his family at Weidlingau.

This apparently brings the negotiations to a close.

It is admitted here that the situation is now worse than ever and Count Cziraky's mission is consid-

# BOMB EXPLODED IN CHINESE TRAIN

Killed Missionary and Wounded Several Others.

The Explosive Was Thrown By An Anarchist and Caused Terror

BOMB IN A PRIVATE CAR

Pekin, Sept. 25 .- At the Pekin railway station yesterday, as a train carrying one of the four missions ordered abroad to study foreign political methods, was leaving, a be exploded inside a private car, killing four minor officials and wounding over twenty other persons,

The wounded included Prince Tsai Tche, who heads the most important mission, and Wu Ting Fang, former minister to the United States, both of who received light injuries.

The perpetrator of the outrage, who was in the car was blown to pieces. The affair created a profound sensation and causes apprehension regarding the safety of the members of the court and leading officials of

the government. The edict appointing the miss mentioned in the foregoing dispatch was issued July 16. A dispatch from Pekin August 29, said the missions were appointed to study foreign systems of government because the dowager empress intended to issue a decree at the new year for the establishment of a parliament twelve years hence.

The pupils in the High school are taking a great deal of interest in the clubs to be formed this week, and the following weeks just as soon as the pupils get well into the work.

There will be a debating club, a dramatic club, choral club and musical club. Theatricals will be given periodically and debates will be features of each week. The musical club will consist of all members of classes who play any instrument. There are many talented pupils in this department and it is thought the musical club this year will be the best in

the school's history.

There, will also be a literary club HE HAS KILLED TWO NEGRO organized in conjunction with the debating club. The pupils seem to take a great delight in this form of work, and also in the literary work. HOPKINSVILLE DIVISION WORK

Birmingham, Ala., Sept. 25 .- It is ow certain that before very long the Illinois Central railroad will be running trains into Birmingham.

Asked if he knew anything on the subject General Agent A. D. Lightner, executive representative here of the Frisco system, confirmed the report that the Illinois Central has arranged to use the Frisco tracks from Jasper to Birmingham, a distance of forty miles. If is also a matter of public knowledge that the Illinois Central has secured a charter in Mississippi to build a line from Corinth, in that state, to Jasper, Ala. This was done last week, and the

It is said that the Illinois Central will use the Mobile and Ohio tracks from Jackson, Tenn., to Corinth, Miss., in return for which the Mobile and Ohio will use the Illinois Central's new road from Corinth to Jasper. # COLE'S HOT BLAST Wonderful Heater and Fuel Saver

For Soft Coal, Lignite or Hard Coal Cost of Stove Saved in Fuel

> As you know one-half of soft coal is gas-the entire gas supply for many cities and towns being made from the same kind of soft coal you are using.

The extent of unburned gases in hard coal is shown by opening the magazine cover of a base burner when the extra oxygen supplied fills the entire stove with flaming gas. Other stoves allow this gas, which is the best part of the coal, also a large part of the heat, to pass up the chimney. This waste will average from \$10.00 to \$50.00 a year for every family and millions of dollars in fuel are thus wasted annually

The Original Cole's Hot Blast Stove Saves All Wasted with Other Stoves

Cole's Original Hot Blast, by means of the Patented Hot Blast draft used in connection with other patented features, distills this gas from the upper surface of the coal, utilizing it as a heat producer along with the fixed carbon or

On account of the patented air tight and gas tight construction giving perfect control over the drafts, it also saves the heat usually wasted up the chimney. \$5.00 worth of hard coal, soft coal or lignite, or a \$1.50 ton of slack or coal siftings is thus made to do the work of twice the amount of fuel in other stoves and the cost of the stove is more than saved in fuel each winter. \$7.50 worth

of slack will heat your house all winter, five tons at \$1 50 a ton does the work

Build only One Fire a Winter

Cole's Hot Blast is so perfect in construction that fire keeps all night, and when the draft is opened in the morning will burn two or three hours with the hard coal or soft coal put in the night before. No other stove does this. Fire, therefore, never goes out, kindling fires is dispensed with, and the rooms are kept at an even temperature all the time.

Read the Guarantee. We are the exclusive agents for Cole's Original Hot Blast and sell it on the accompanying guarantee which cannot be made on any other heating stove in the world. If you want to save half your fuel bill and would enjoy the luxury of getting up in a warm house on cold winter mornings without kindling fires, buy Cole's

**Avoid Imitations** 

Imitations of this Original Hot Blast are many. None of them has the absolutely air-tight and gas-tight construction throughout which Cole's Hot Blast has by reason of its numerous patents. A Patented Steel Collar connects the elbow draft to the stove body and cannot open by action of the fiercest heat. The Patented Compound Hinge on the lower draft cannot warp, and the draft door closes air-tight by its own weight. The guaranteed Smoke-proof Feed Door prevents smoke, dust or gas escaping when

Imitations soon open seams and cracks which spoil them for keeping fire and cause the gas half of the coal and much of the heat to escape up the chimney.

See the name "Cole's Hot Blast from Chicago" on the feed door of our stove. None genuine without it. Ask to see the patented dustless ash cover for removing ashes. Our method is the only clean way.

We like to see public officers get a squaré deal, although if some of them did we fear they would have to seek greener fields and pastures new. The schools cannot get as much under the second class charter as they did under the former charter. They were formerly allowed as much as fifty cents on the \$100, but under the second class charter they cannot draw over thirty-five cents on the hundred dollars, fifteen cents on the hundred dollars less than they were getting before the transfer to the second class. The reason this has handicapped the schools is that the transfer to the second class did not increase the property values, and the assessment not having increased, and the board being limited to 35 cents on the \$100, it cannot get enough to run the schools, whose expenses in-

crease yearly. The democratic boards in recent years drew 50 cents on the \$100 for the schools most of the time, and squandered it in a costly building about half of which is not used, and in plumbing and heating jobs which were responsible for subsequent conditions which cause these same democrats such virtuous spasms of indig-

One class of officers of the law have a great graft which they practice on the state on all occasions. A person charged with some grave crime escapes, and they quietly go to work to locate him. When they have succeeded they have a request made of the governor to offer a reward for the fugitive's apprehension. When the reward is offered they immediately go get their man, and for it gouge the state for from \$50 to \$200, and sometimes more, for merely doing their duty. A man was arrested here recently who had been wanted in Mayfield for almost a year for killing his brother and another man. Aug 31...3,701
A peculiar feature of the case is that only a few days ago Gov. Beckham was asked to offer a reward for him, and did so, the amount being \$200. # THE CHARITY WORK TO BE STARTED SOON

People Have No Idea of the Destitution and Suffering.

When Cold Weather Comes There Will Be Plenty of Work to Do-Last Year's Plan.

The pauper question, one which as heretofore been a source of great worry and trouble to the county and ity authorities alike, has come to the front again, now that winter is approaching, and the charity club is preparing to establish even a better stem than was maintained so sucessfully last winter when hundreds for the poor. The club is just starting out on its winter's work and should be aided in every way possible by all who can spare even the smallest sum to the good cause.

"No one knows the destitute condition of the paupers in the city beter than the average physician," City hysician Bass declared to a report er, "and I am in a position to see nore of it than the average doctor, because of my duties, which bring me within immediate touch with the lowest of the human race."

A Sun reporter, acting on his suggestion, made several trips with the city physician, and the conditions found to exist in some portions of the city were deplorable indeed.

The doctor was called out to several negro cabins on the south side One house of two rooms presented the appearance of a junk shop. Several wash tubs, well worn with use, were stacked on the rickety front porch which was on the point of collapse.. Several dirty benches were strewn about the yard, and chairs minus the bottoms, were on the front porch along with rags of every kind from bran sacks to pieces of crazy quilt. In the bundle of rags reposed a negvo baby a few months of age The mother was inside ill, and had sent her baby out on the porch to be cared for by several ragged boys not over 5 years old. They had placed the child in the filth and gone out to play. Sitting by the patient was an aged negress. She held a dirty glass, of water and from time to time would apply it to the womans' forehead to cool her burning fever.

The woman was lying on the floor with a few rags to offer comfort to the hardness of the boards, the room affording no bed. She had been ill ey enough to employ a physician and go to Brookport for tonight. being ignorant of the fact that she Paris, Sept. 25.—The following the king, "as I had also ordered fried could secure the city physician, free et today.

To Raise Rates on Whiskey. Louisville, Ky., Sept. 25.—The Kentucky and Tennessee Board of Underwriters is revising its insurance rates on whiskey in bonded warehouses, and an increase of 33 1-3 per cent, in the rates on whishe died several days later, the result key stored in brick warehouses, where quick aging processes are in use, will be announced ina few days. At present the flat rate is 37 1-2 cents, which will be raised to 50

The reason given for the raise is that the process by which the whiskey is aged involves the use of artificial heat or gases, increasing the hazard of fire.

The petition was granted. Margaret Butts-Darboe some years go was taken from the Kentucky orphans' home at Louisville and adopted by Mrs. J. W. Butts of this city. The young girl took the name of Butts, and, being far more mature than the usual run of girls at her age, became when she was not eleven years old, one of the belles of the county. Six months ago she was wooed and won by Riley Darboe, their marriage being one of the sensations of the day. ### COSTUME PIECE

No. 2 of the Series

(Continued from yesterday.)

"Exactly. Well, it seems that Rosen thall was one. He must have let it out to Purvis in his cups. Anyhow, I heard Purvis taunting him with it and threatening him with the breakwater at Cape Town, and I begin to think our friends are friend and foe. But about tomorrow night. There's nothing subtle in my plan. It's simply to get in while these fellows are out on the loose and to lie low till they come back, and longer. If possible we must doctor the whisky. That would simplify the whole thing, though it's not a very sporting game to play. Still, we must remember Rosenthall's revolver. We don't want him to sign his name on us. With all those Kaffirs about, however, it's ten to one on the whisky and a bundred to one against us if we go looking for it. A brush with the heathen would spoil everything, if it did no more. Besides, there

are the ladies" "The deuce there are!" "Ladies with an i, and the very voices for raising Cain, I fear, I fear the clamor! It would be fatal to us. Au contraire, if we can manage to stow ourselves away unbeknown half the battle will be won. If Rosenthall turns in drunk it's a purple diamond apiece. If he sits up sober it may be a bullet 'instead. We will bope not Bunny, and all the firing wouldn't beon one side; but it's on the knees of

the gods." And so we left it when we shook bands in Piccadilly-not by any means as much later as I could have wished Raffies would not ask me to his rooms that night. He said be made it a rule to have a long night before playing cricket and-other games. His flux! word to me was framed on the same

principle. "Mind, only one drink tonight, Bunny; two at the outside-as you value your life-and mine!"

I remember my abject obedience and the endless, eleepless night it gave ric and the roofs of the houses opposite standing out at last against the blue gray London dawn. I wondered whether I should ever see another and was very hard on myself for that little expedition which I had made on my own willful account.

It was between 8 and 9 o'clock in the evening when we took up our position in the garden adjoining that of Reuben Rosenthall. The house itself was shut up, thanks to the outrageous libertine next door, who, by driving away the neighbors, had gone far toward delivering himself into our hands. Practically secure from surprise on that side, we could watch our house under cover of a wall just high enough to see over, while a fair margin of shrubs in either garden afforded us additional protection. Thus intrenched we had stood an hour, watching a pair of lighted bow windows with vague shadows flitting continually across the blinds and listening to the drawing of corks, | doe the clink of glasses and a gradual crescendo of coarse voices within. Our luck seemed to have deserted us. The owner of the purple diamonds was dining at home and dining at undue eagth. I thought it was a dinner par-Raffles differed. In the end we proved right. Wheels grated in the drive, a carriage and pair stood at the steps, there was a stampede from the dining room, and the loud voices died away, to burst forth presently from

the porch. Let me make our position perfectly clear. We were over the wall, at the side of the house, but a few feet from the dining room windows. On our right one angle of the building cut the back lawn in two diagonally; on our left another angle just permitted us to see the jutting steps and the waiting carriage. We saw Rosenthall come out-saw the glimmer of his diamonds before anything. Then came the pugillst, then a lady with a head of hair like a bath sponge, then another, and the party was complete.

Raffles ducked and pulled me down in great excitement.

"The ladies are going with them," waispered. "This is great!"

"That's better still."

"The Gardenia!" the millionaire had

room windows open on the lawn. Bunit's the psychological moment. Where's that mask?"

I produced it with a band whose trembling I tried in vain to still and could have died for Raffles when he made no comment on what he could not fall to notice. His own hands were firm and cool as he adjusted my

mask for me and then his own.

"By Jove, old boy," he whispered cheerly, "you look about the greatest ruffian I ever saw! These masks alone will down a nigger if we meet one. But I'm glad I remembered to tell you not to shave. You'll pass for Whitechapel if the worst comes to the worst and you don't forget to talk the lingo. Better sulk like a mule if you're not sure of it and leave the dialogue to me; but, please our stars, there will be no need. Now, are you ready?"

"Quité." "Got your gag?"

"Shooter?" "Yes."

"Then follow me." In an instant we were over the wall, n another on the lawn behind the house. There was no moon. The very stars in their courses had veiled themselves for our benefit. I crept at my

A good score of electric burners glowed red for the fraction of a second, then rained merciless white beams into our blinded eyes. When we found our sight, four revolvers covered us, and between two of them the colossal frame of Reuben Rosenthall shook with a wheezy laughter from hend to foot.

"Good evening, boys," he biccoughed. "Glad to see ye at last. Shift foot or finger, you on the left, though, and you're a dead boy. I mean you, you greaser!" he roared out at Raffles. "I know you. I've been waltin' for you. I've been watchin' you all this week. Plucky smart you thought yerself, didn't you? # How Is Your Heart?

Is your pulse weak, too slow, too fast, or does it skip a beat? Do you have shortness of breath, weak or hungry spells, fainting, smothering or choking spells, palpitation, fluttering, pains around the heart, in side and shoulder; or hurt when lying on left side?

If you have any of these symptoms your heart is weak or diseased, and cannot get better without assistance.

Dr. Miles' Heart Cure strengthens weak hearts, and rarely ever fails to cure heart disease. Try it, and see how quickly you will find relief.

quickly you will find relief.

"About January 1st, 1902, I took down with weakness and dropsy, and gradually grew worse. I was told by my family physician that my ease was hopeless. My neighbors and family had given me up to die. My limbs and body were swollen to one-third larger than normal size, and water had collected around my heart. For at least three months I had to sit propped up in bed to keep from smothering. I sent for five bottles of Dr. Miles' Heart Cure, and by the time I had taken them all I was entirely cured. I feel better than I have for twenty years, and I am able to do any kind of work on my farm. My attending physician told me that if it hadn't been for Dr. Miles' Heart Cure I would now be in my grave."

Great preparations are being made by the local I. C. for the coming winer season, and much will be done to add to the comfort of the mechanics and to facilitate the work in the

Orders were received Saturday from headquarters authorizing the local officials to begin work on the tank repairing shop. This is an improvement which will mean a great leal to the men and to the road. At present tanks are repaired in the open, the boiler makers suffering from the heat in the summer and cold in the winter. The shed will be located between the woodworking department and the transfer table and will offer shelter the season around. The material is here and work will positively start this week.

This morning the pipe fitting gang began putting in steam radiators in the wood working shops, the mil) department, to (replace the stoves which have been a source of much worry to the officials. This will preclude the danger of a conflagration from fire being left in the stoves, the stoves being taken out entirely.

The steam heating plant in the round house will also be overhauled, t being defective in many ways: Work on this improvement will begin in a few days.

DASH FOR THE POLE

Will Be Made From the Klondike Next June.

Victoria, B. C., Sept. 2 ! .- Enthuslasm is growing in Dawson, and the entire Klondike country over the projected Varicle dash for the pole. It is Dawson's one great subject, from Gov. McInnes in the executive mansion down to the porter at the Mac-Donald hotel, they being copartners. Gov. W. W. B. McInnes, as honorary president; Dr. Alfred Thompson, M. P., president, and the vice presidents, who are the American, the French, the Scandinavian, the Italian and the German consuls, are working enthusiastically, while Dr Varicle, with the advice and active aid of all the most famous guides, is carefully laying out what may be termed the practical program for the expedition.

R. Auzias, Eurenne, consul for France at Dawson and second vicepresident of the polar research association, will enlist the co-operation and support of the Alaska club, supplementing financial and practical aid already promised by the chief officers of the famous Arctic brotherhood. This winter the company, under Dr. Varicle, will make an overland test in the Yukon, choosing the wildest and most difficult districts to traverse that are known to the veterans, of the proposed methods of travel and equipment, experimenting with mule-meat food for the dogs various styles in team make-up and driving, so that they will not stagger blindly into the field when the great expedition itself is launched in June, 1906.

The confidence of the Dawsonites in their polar expedition is based altogether upon the associated facts that only the most approved methods of far Arctic travel will be employed and all the company will be veterans of the far North, inured to its climate and conditions, and capable of advancing where Southern men would be unable to move.
